ProfITsoft

1 тиж.

ProfITsoft is proud to be part of the IT Connect Ukraine initiative — a project that not only unites the Ukrainian IT community across borders, but also builds a strong foundation for new opportunities, partnerships, and growth.

We're actively contributing to this initiative by sharing our team's expertise and investing our time and resources to support Ukrainian IT where it's needed most.

Huge thanks to [Kharkiv IT Cluster](#) and [EPAM Systems](#) for leading such a powerful initiative — one that proves: Ukrainian IT is about unity, resilience, and moving forward — no matter the challenges.

Olga Shapoval

Executive Director at Kharkiv IT Cluster | Head of NGO | Community leader | Strategist | EEN Contact p...
 3 тиж.

Ukrainian IT unites people beyond borders. That's why, together with [EPAM Systems](#) (Ukraine), we are launching IT Connect UA.

This initiative is designed to help Ukrainians in Ukraine and around the world build a successful IT career with leading Ukrainian companies.

For us, this project is about staying connected — about the opportunity to remain part of the national IT ecosystem, even when borders separate us.

The demand for junior specialists in Ukrainian IT companies remains stable. According to an internal survey, [Kharkiv IT Cluster](#) members plan to hire a significant number of professionals in 2025. IT Connect UA will help participants find their career path while enabling companies to discover new talent.

The program includes two stages of online learning and career consultations across various IT fields. With mentor support, participants will navigate their journey with confidence. The top graduates will have the chance to interview and receive job offers from Ukraine's leading tech companies.

Thanks to our partners, participation is free, ensuring equal opportunities for everyone eager to

start an IT career.

A huge thank you to our first project partners: [Cloud Works](#), [Intellias](#), [proarea.com](#), [Chainza.io](#), [WebMeridian](#), [ITRDev](#), [CHM software Ltd.](#), [ProfiTsoft](#), iDev Agency

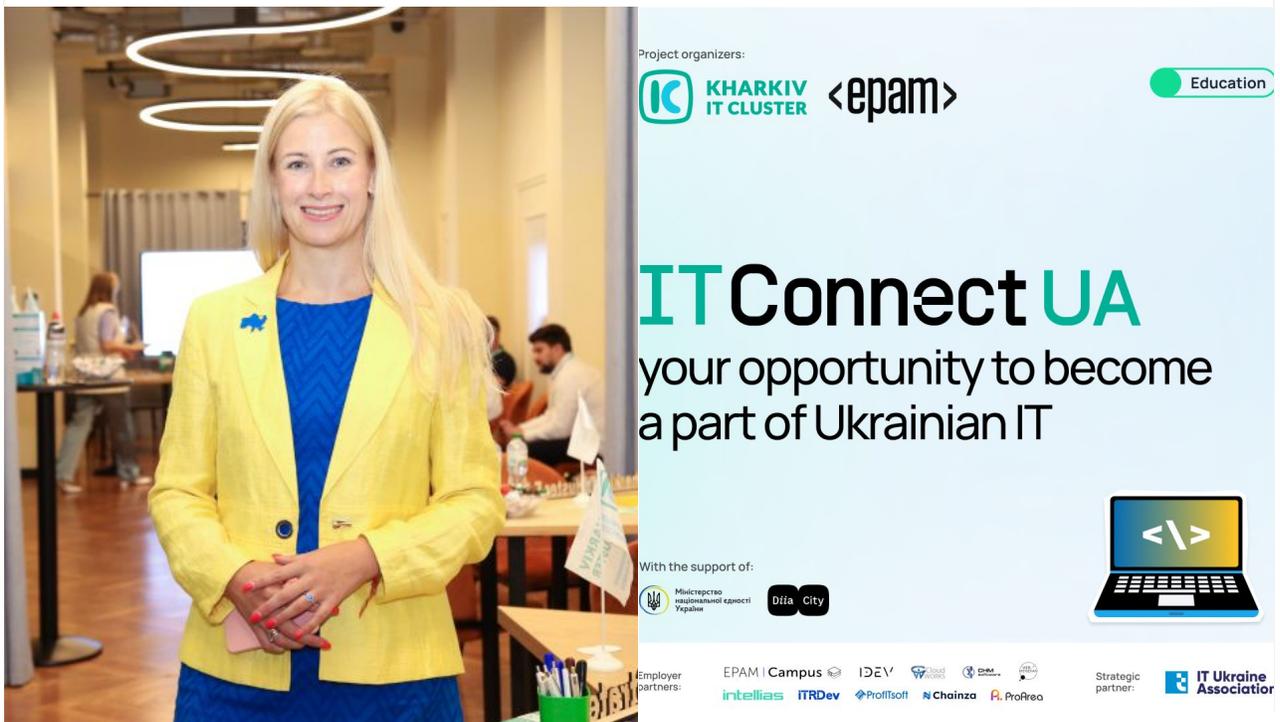

The project is implemented by Kharkiv IT Cluster and EPAM Ukraine, with the support of the Ministry of National Unity of Ukraine and [Diia City](#), an initiative of the [Ministry of Digital Transformation of Ukraine](#). Our strategic partner is the [IT Ukraine Association](#).

We are accepting applications for the project from the first 500 Ukrainians from Ukraine and many parts of the world 🇺🇦

If you know students in Ukraine or abroad, college and university graduates, junior professionals, veterans who want to develop a career in IT, feel free to share this post with them 🍷❤️
